Abstract:

The present invention provides a method of applying a plaster finish to a wall surface (2) comprising the steps of providing a plurality of spacers (7) each of which is a length of material formed into a repeating compact configuration such as a coil or a zigzag; securing each spacer (7) and a reinforcing mesh (8) over a backing board (5) and building paper (6), and applying a plaster finish over the reinforcing mesh (8) such that both the mesh(8) and the spacers (7) are embedded within the plaster.
